Description

Description

The perfect choice for professional landscaper who want the innovative and commercial-grade quality of a Lazer Z zero-turn riding mower, but in a value package. The Lazer Z E-Series zero-turn mower features the same welded, heavy-duty, 1.5"x 3" tubular steel unibody frame found throughout our Lazer Z models. You can also choose from two rugged Kawasaki Registered V-Twin engines, a Kohler Registered CommandTrademark Pro, or a Vanguard V-Twin engine matched to a full-floating, UltraCutTrademark Series 4 cutting deck, in 48, 52, 60, or 72-inch deck widths. Lazer Z E-Series zero-turn mowers come equipped with a full-suspension seat that enhances operator comfort, leading to less fatigue and increased efficiency.

Features

Hydro Drive, Simplified

Our hydro drive system has no hoses to leak and just one easy-to-change belt. Only simple, annual maintenance is required. It also lowers the center of gravity for improved handling.

Less Time At The Pump

Gas-powered E-Series models have a single 8-gallon tank with one fill location.

Fewer Grease Points

With just four grease points that only need annual greasing, the Lazer Z delivers maximum performance with minimum maintenance. Greaseless spindles and only four grease points on the entire machine.

Rear Discharge Deck

Available in 60 and 72 inch cutting widths, the rear discharge deck offers increased clipping discharge control, reduced noise, and the ability to trim on both sides of the cutting deck while keeping the operator clean.

Unibody Frame

Our one-piece body frame is a classic case of "less is more." Because, fewer parts equal more strength. And, more durability. So, in the interest of accuracy, the Lazer Z's unibody frame is actually a case of "less is way more."

On-Board Diagnostics

Check vital functions at a glance on the digital screen. An electronic fuel gauge with low fuel warning on all Lazer Z units, battery voltage warning, hour meter and OPC safety switch monitoring make troubleshooting easy.

Ultracut Series 4 Deck

This full-floating deck uses maintenance free spindle with a splined blade driver to stop bolt tightening on impacts. And, our patented bearing design on idler arm pivots only needs annual service.

Tool-less Belt Removal

Deck and hydro belt can be installed without using any tools.
