Price	\$2,799.00
-------	------------

Description

Innovative Performance. Unrivaled Strength.
The 3X is the powerhouse of the X SeriesRegistered line. With a patented three-stage system, the 3X clears deep snowfall up to 50% faster than a Cub Cadet 2XRegistered two-stage snow thrower. That means you can easily and quickly remove 18 inches of snowfall at a comfortable pace. It will even bust through the wall of winter at the end of the driveway. When you have 3X strength, nothing is in your way.

PATENT-PENDING THREE-STAGE SYSTEM

The 3X three-stage snow thrower is the first of its kind and a leader in the snow removal marketplace. First, the collection augers gather snow, ice and slush and move it all towards the center. Then, Cub Cadet's new high-volume accelerator cuts and chops winter's worst. Accelerating it right into the high-performance discharge impeller where it's thrown up and out of the high-impact chute.

TRIGGER-CONTROL POWER STEERING

With just one finger, you can engage the power steering on any 3X Series three-stage snow thrower model. Allowing for unmatched control and effortless maneuverability while enjoying single-hand operation.

PUSH-BUTTON ELECTRIC START

A large, powerful four-cycle Cub Cadet OHV engine gives you more power on our three-stage snow throwers. And it all begins with a simple push of a button. Just plug into a standard 110V wall outlet, press the start button and you're ready to go.

LED LIGHT BAR

Illuminate the clearing path for better visibility.

NEW 3X 28"

SPECIFICATIONS

Intake Height
21"

Chute Rotation
4-way / multi-directional / 200°
